Building Beautiful

While Building Green

Discover the "green design power" of luxurious hand-cast Oceanside Glasstile®. With many colors using from 25-85% post-consumer recycled bottle glass (more than 2 million pounds per year), Oceanside Glasstile turns glass that would otherwise go into landfills into design materials that are beautiful, expressive, and sustainable. For a showroom near you, see www.glasstile.com or call 866-OGT-TILE (648-8453).
